NexGenius Website - UI/UX & Feature Upgrade Requirements

Objective

Upgrade the existing NexGenius website into a premium, modern, enterprise-level AI company website.

The existing project must be enhanced instead of rebuilt. Maintain clean architecture while significantly improving the overall UI, UX, animations, content hierarchy, and service offerings.

UI / UX Upgrade

Theme

- Modern Premium
- Dark + Emerald Green Theme
- AI-inspired futuristic design
- Enterprise SaaS quality
- Glassmorphism where appropriate
- Soft gradients
- Clean spacing
- Professional typography
- Premium iconography

Primary Color

- Emerald Green
- Green Accent
- Dark Background
- White Typography

Reference Feel

- OpenAI
- Vercel
- ElevenLabs
- Anthropic
- Linear
- Stripe

- Retell AI
-

Animations

The entire website should feel alive.

Implement premium animations throughout the project.

Examples

- Smooth page transitions
- Scroll reveal animations
- Fade In
- Slide Up
- Stagger animations
- Hover interactions
- Floating elements
- Animated gradients
- Animated background blobs
- Mouse interaction effects
- Premium button hover effects
- Card hover animations
- Icon animations
- Counter animations
- Loading animations
- Scroll progress indicator
- Text reveal animations
- Section transitions
- Premium mobile animations

Animation quality should be comparable to modern SaaS websites.

Recommended libraries

- Framer Motion
 - GSAP (where necessary)
-

Services Page Update

Replace the existing service structure with the following.

AI Agent Development (Primary)

- Custom AI Agents
 - Customer Support AI Agents
 - Sales AI Agents
 - Lead Qualification AI Agents
 - Appointment Booking AI Agents
 - HR & Recruitment AI Agents
 - Internal Knowledge AI Agents
-

AI Chatbot Development (Primary)

- Website AI Chatbots
 - WhatsApp AI Chatbots
 - Messenger & Instagram Chatbots
 - Customer Support Chatbots
 - FAQ Chatbots
 - E-commerce AI Chatbots
-

Voice AI Solutions (Primary)

- AI Voice Agents
 - AI Receptionist
 - AI Call Answering
 - AI Appointment Booking Calls
 - AI Outbound Calling
 - Voice Customer Support
-

RAG AI Systems (Primary)

- Knowledge Base Chatbots
 - Document AI
 - PDF Chatbots
 - Company Knowledge Assistant
 - SOP & Policy Assistant
-

AI Automation (Primary)

- Workflow Automation
- CRM Automation
- Email Automation

- Lead Management Automation
 - Data Entry Automation
 - Invoice Automation
 - Business Process Automation
-

Custom Web Applications (Primary)

- AI-Powered Websites
 - Custom Web Applications
 - SaaS Platforms
 - Business Dashboards
 - Admin Panels
 - Client Portals
-

E-commerce Solutions (Primary)

- Shopify Stores
 - WooCommerce Stores
 - AI Shopping Assistants
 - Product Recommendation Systems
 - Order Automation
-

WordPress Development (Primary)

- Business Websites
 - Landing Pages
 - Portfolio Websites
 - Blog Websites
 - Speed Optimization
 - Website Maintenance
-

AI Consulting

- AI Strategy
 - Business AI Roadmap
 - AI Integration
 - Process Optimization
 - AI Transformation Consulting
-

Homepage Services Section

The homepage should prominently showcase the following core services because they represent the company's primary offerings.

-  AI Agent Development
-  AI Chatbot Development
-  Voice AI Solutions
-  RAG AI Systems
-  AI Automation
-  Custom Web Applications
-  E-commerce Solutions
-  WordPress Development

These services should have premium cards with animations, icons, hover effects, and clear CTAs.

Agentic AI Positioning

Throughout the website, position NexGenius as an Agentic AI company rather than a traditional software house.

Messaging should emphasize:

- Agentic AI
 - AI Automation
 - AI Employees
 - AI Workforce
 - Business Process Automation
 - Intelligent AI Systems
 - AI-First Solutions
 - Enterprise AI
 - Autonomous AI Agents
 - AI Transformation
-

General Improvements

Improve every section of the website including:

- Hero Section
- Services
- About
- Why Choose Us

- Process
- Industries
- Testimonials
- FAQ
- CTA Sections
- Contact
- Footer

Improve content hierarchy, spacing, responsiveness, accessibility, SEO, and overall user experience.

Development Requirements

- Maintain reusable components.
 - Follow clean architecture.
 - Preserve existing functionality.
 - Fully responsive across all devices.
 - Optimize performance.
 - Improve accessibility.
 - Ensure SEO best practices.
 - Keep code clean and modular.
-

Acceptance Criteria

- Premium modern UI/UX.
- Enterprise-level animations.
- Green AI brand identity.
- Updated services architecture.
- Agentic AI-focused positioning.
- Fully responsive.
- Clean reusable code.
- No build errors.
- No TypeScript errors.
- No linting issues.
- Production-ready implementation.
